

PVCu Cream Cleaner

Revision: 11/04/2019

Page 1 from 1

Technical data

Basis	Solvent free mixture with limestone
Consistency	High viscous fluid
Density	Ca. 1,50 g/ml
Application temperature	5 °C → 25 °C

* These values may vary depending on environmental factors such as temperature, moisture, and type of substrates. ** This information relates to fully cured product.

Product description

PVCu Cream Cleaner is a high quality, non-settling, liquid cream that has mild abrasive perfumed cleaning and rejuvenating properties for a glossy result on white or veneered PVCu frames and other plastics.

Substrates

Substrates: white or veneered PVCu window frames, hard PVC

Nature: dirty.

Surface preparation: No pretreatment required.

Properties

- Solvent free
- Fast acting
- Ready to use (no mixing required)
- Mild abrasive
- Restores to a clear and shiny finish
- Non-smearing
- Multi-purpose use
- Not flammable
- VOC free

Applications

- Where the use of a non-hazardous, solvent free cleaner is required.
- Cleaning of most types of white and veneered PVCu frames, sills, cladding, panels and trims.
- For removing most ingrained dirt, grease, uncured sealant, pencil and pen mark.
- For rejuvenating PVCu frames gone dull.
- Cleaning of plastic garden furniture.

Packaging

Colour: white-beige

Packaging: 1 L bottle

Shelf life

12 months in unopened packaging in a cool and dry storage place at temperatures between +5°C and +25°C.

Application method

Application method: Shake thoroughly before application. Soak a clean absorbent cloth with PVCu Cream Cleaner, then simply wipe the surface clean of contaminants. For stubborn stains, apply more cleaner to the cloth, press firmly and rub in a circular motion. This process can be repeated where necessary. Polish up the cleaned surface using a second dry cloth for a bright finish. Always work with a clean cloth to avoid contamination of the surface.

Health- and Safety Recommendations

Consult label and material safety data sheet for more information. Take the usual labour hygiene into account. Wear eye protection. The user has to check if the product is suitable for the specific application.

Remarks

- It is recommended to do a compatibility test prior to application.
- Do not dilute product.

Remark: This technical data sheet replaces all previous versions. The directives contained in this documentation are the result of our experiments and of our experience and have been submitted in good faith. Because of the diversity of the materials and substrates and the great number of possible applications which are out of our control, we cannot accept any responsibility for the results obtained. Since the design, the quality of the substrate and processing conditions are beyond our control, no liability under this publication is accepted. In every case it is recommended to carry out preliminary experiments. Soudal reserves the right to modify products without prior notice.
